APPLICATION 16077 PERMIT 10107 LICENSE 5795

ORDER CORRECTING DESCRIPTION
OF THE POINT OF DIVERSION
AND PLACE OF USE, AND
AMENDING LICENSE

WHEREAS:

1. License 5795 was issued to R.M. Hickman on October 22, 1959 and was filed with the County Recorder of Sonoma County in Book 1707, Page 279, Document F 90554.
2. A March 27, 1990 staff inspection of the project site found that the point of diversion and place of use had been incorrectly described in the license.
3. Corrections are needed to agree with the locations shown on the (7.5') U.S. Geological Survey Quadrangle Map - Mount St. Helena.
4. The Board has determined that said corrections will not initiate a new right nor operate to the injury of any other harmful user of water and that good and sufficient cause has been shown for said corrections.
5. The license conditions pertaining to the continuing authority of the Board should be updated to conform to the current common law public trust doctrine contained in Title 23, California Code of Regulations, Section 780(a).

NOW, THEREFORE, IT IS ORDERED THAT:

1. The description of the point of diversion (POD) and place of use (POU) under license 5795 be corrected to read:

POD - North 100 feet and East 1,500 feet from the SW corner of Section 3, T9N, R8W, MDB&M, being within SE $\frac{1}{4}$ of SW $\frac{1}{4}$ of said Section 3, also described as California Coordinate System, Zone 2, North 358,400 and East 1,789,700

(0000002)

POU - Stockwatering, Recreational, Fish Culture and Irrigation uses at the onstream reservoir located within the SE $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 3, and NE $\frac{1}{4}$ of NW $\frac{1}{4}$ of Section 10, T9N, R8W, MDB&M; irrigation of 7 acres, described as follows:

- 1 acre, within SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 3, T9N, R8W, MDB&M

2. The continuing authority provisions of this license be amended to read:

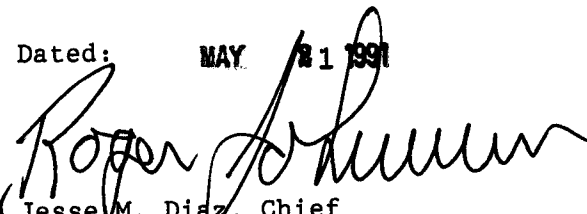

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
